Fall Hours

In the fall and winter we see obvious changes in the weather outside. Along with these weather changes comes lighting changes. Please be cautious when entering and exiting your buildings each evening.

Know your surroundings at all times. Self defense is only one key element of safety. The key to safety is awareness and avoidance coupled with a keen understanding of where you are and what is happening around you.

Remember that when taking out the trash at night or leaving the buildings always do it with a buddy. The more in the group the less likely anything will happen.

If you ever feel uncomfortable because of a car in the parking lot please contact the Tully Team directly. Your safety is our top priority.
